

**LOS ANGELES PACIFIC**  
UNIVERSITY

## Bachelor of **PUBLIC HEALTH (BPH)**

### ABOUT THE PROGRAM

Students will gain practical skills and learn to use tools and technologies that will prepare them to solve real-world problems in public health, including analyzing healthcare data, implementing quality improvement initiatives, managing healthcare projects, and ensuring compliance with healthcare laws and regulations. By combining theoretical knowledge with practical applications, the program aims to produce graduates who are critical thinkers, problem solvers, and effective leaders in the healthcare industry.

### CAREER OPPORTUNITIES

Graduates of the BPH program can pursue a variety of careers, including:

- Public Health Educator
- Epidemiologist
- Health Policy Analyst
- Environmental Health Specialist
- Community Health Worker

### Highlights

- Understand the intricacies of advanced, interconnected global public health systems and the evolving regulatory environment, including digital health laws and international health policies
- Apply cutting-edge principles of public health and healthcare management, leveraging technology and innovation to improve the efficiency, effectiveness, and sustainability of healthcare delivery
- Analyze large-scale healthcare data using advanced analytics, AI, and machine learning to drive data-informed decision-making and implement transformative quality improvement initiatives
